Map Installation

1. Download the map

2. With your extraction software (WinRAR, 7Zip, etc.) open the map archive.

3. Locate the file `.minecraft`. Location of this file depending of your exploitation system :

Windows : Press simultaneously + and tape `%appdata%`.

Mac OS : `minecraft` file be in :
 `user > Library > Support Application`.

Linux : Press simultaneously + and tape `.minecraft`. Validate and you will directly brought to the file (GNOME, CTRL+H in the personal file for the other graphic environment).

4. Open the file `.saves` and extract the archive file of the map

5. Close the file and open Minecraft. Your party game is available in the single player menu.

Installation Resourcepack

Inside the downloaded zip, take the **resourcepacks file**, its location can change depending on your operating system.

Windows : Press simultaneously + , tape `%appdata%` and validate. Your **resourcepacks file** is inside of « **.minecraft** »

Linux : The file is located in the user folder « */home/*«. Press simultaneously +

, tape **.minecraft/bin.** Validate and you will directly brought to the file (GNOME).

Mac OS : The `minecraft` file is inside :
`User > library > SupportApplication`.
