

NEX CityXI

FINAL EDITION

What you need to know about the installation

With love,

NEX Channel

NEX CityXI

What you need to know about the installation

- Subscribe to **NEX Channel** for the videos and tutorials.
 - **CHANNEL:** [Click here](#)
 - **PLAYLISTS:** [Click here](#)
- We suggest using **Modern HD 1.12.2** Resource pack ([Download here](#)).
- To enjoy the map at full potential you need these **mods**:
 - DecoCraft 2.6.3;
 - MalisisCore 6.5.1;
 - MalisisDoors 7.3.0;
 - PRTLlib 1.0.4;
 - ThutCore 5.21.0;
 - ThutTech 6.1.6;

The installation is very easy if done with **TLauncher** ([Click here to see our tutorial](#)).

You'll need also **Forge version 14.23.5.2847**.

- Thanks to the people that worked for this amazing project:
 - Nunzio;
 - Lorenzo;
 - TheEmperorNick;
 - Fabri2.0;
- **Do you experience lag or crashes?** Contact us on our social networks or on our Discord server. The map reached a really big expansion and a lot of details. So it's normal that it runs quite slowly. We suggest loading the world and waiting a couple of minutes so that it can load correctly before starting the exploration.
