

NEX CityXI

FINAL EDITION

WELCOME TO THE FINAL UPDATE.

Here's a brief introduction about what's waiting for you in the new version of the **City Maps LEADER**. Enjoy it!

Everything has been changed, again.

This is our vision of the perfect NEXCity. We couldn't improve it more than this. This is the combination of A DEEP overall CITY CHANGE AND A NEW BIG AND AMAZING EXPANSION.

New archive!

- We updated the way the archive is composed, adding **ITA** and **ENG** versions of every file.
- From this version, the introduction and readme are separated, for a cleaner and easier experience. We also made every document in PDF and the archive in ZIP format, for a better **compatibility**.
- A new **Tourist's Guide** has been added for the new city visitors, with the History of NEXCity, every attraction, natural landscape and the most important buildings. Perfect for you next virtual holiday!

Completely different city!

- Every single building has received a **fresh new look**, take a look at the changelog for more details.
- We managed to refine **every single detail** to be perfectly integrated, because with these mods it's not easy.
- The city has reached **its maximum expansion**, so the next updates will only be to the already-existent buildings.

You can even use it for your videos!

- You can use it for your videos **but leave a link** to the map and NEX Channel.
- If you post something about NEXCity, use the **hashtag #NEXCity**. Let's be a big social family!

There will be other Special Editions?

- It's very unlikely that we'll release new Special Editions, but **we'll continue updating the Final Edition**.
- We will probably release other versions of NEXCity XI, such as No-mods Edition, Christmas Edition, Blackout Edition... But probably next year!
